

My Fancy Rmd

Some changes in YAML

Ryan Munnikhuis

Contents

My first chapter	1
My second chapter	1

My first chapter

Preface

this is the cool header

```
a = 12  
  
b = 13  
  
a_b = a + b
```

My second chapter

This is a note of something in second doc

```
eq = expression(3 * x ^ 3 * x ^ 4)  
  
dx_dt = D(expr =eq, "x")  
  
dx_dt
```

Even more cool stuff

```
## 3 * (3 * x^2) * x^4 + 3 * x^3 * (4 * x^3)
```
